Profile

Web Developer with experience in developing scalable and production-ready web applications, specializing in React, Next.js, and TypeScript.

Experienced in modern frontend architecture, authentication flows, and API integrations. Enjoys collaborating with international teams and delivering user-centric interfaces with strong performance and accessibility standards.

His background in Mechanical Engineering lends him strong analytical thinking and problem-solving skills to software development.

Experience

Web Developer — Code2Career AB (02/2026 – Present)

- Contributing to the development of modular SaaS applications
- Supporting development teams by reviewing code and providing technical feedback.
- Participating in Git and GitHub workflows including pull requests and code reviews.
- Collaborating with development teams on feature implementation and architecture decisions
- Assisting with API integrations and backend feature development

Web Developer — Pick Your Pour (10/2025 – Present)

- Developed and deployed production-ready frontend features using React, Next.js, and TypeScript.
- Implemented secure authentication flows using Firebase Authentication and backend APIs.
- Collaborated with an international development team using Git, code reviews, and agile workflows.
- Improved UI performance, accessibility, and component scalability across the application.

Independent Full-Stack Projects (Nov 2024 – Present)

- Designed and developed multiple full-stack web applications using modern React and Next.js architecture.
- Implemented authentication systems, database schemas, and API integrations.
- Built scalable frontend architecture using TypeScript, Redux Toolkit, and React Query.
- Managed version control and collaboration using Git and GitHub.

Featured Projects

Personal Portfolio

A personal portfolio website built with Next.js, showcasing my projects, skills, and experience. It features a clean and responsive design, smooth animations, and is optimized for performance.

Live: [Personal Portfolio](#)

GitHub: [Personal Portfolio-Repository](#)

The Paradise Hotel

Full-stack hotel booking platform built with React, Next.js, TypeScript, and Supabase. Includes authentication, booking management, and scalable database architecture.

Live: [The Paradise Hotel](#)

GitHub: [The Paradise Hotel-Repository](#)

Travel Route App

Interactive travel planner with maps and global state management using Redux Toolkit.

This project is currently being upgraded to a full-stack Next.js version (Next.js 16 + Supabase + Supabase Auth + Prisma ORM).

GitHub: [Travel Route App-Repository](#)

Tech Stack

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, TanStack Query

Backend: Node.js, Next.js Server Actions, REST APIs, Prisma ORM, PostgreSQL, Supabase, Firebase Authentication, Auth0, Stripe

Testing: Vitest, Jest, Playwright

DevOps: Vercel, Netlify, GitHub Actions

Tools: VS Code, Figma, Web Performance Tools

Education

Web Development Program — [Code2Career AB](#), Sweden (Remote)

B.Sc. Mechanical Engineering — [Bartın University](#)
